## DEFECTS IN OCEAN DRILLING PROGRAM VOLUMES

The Ocean Drilling Program of the National Science Foundation has recently notified the Library Programs Service (LPS) about a problem of fading covers on several volumes of the Proceedings of the Ocean Drilling Program, Part A. The issuing agency has offered replacement volumes to depository libraries. The letter appearing on the following page provides instructions.

All of the volumes in question, 101/102, 103, and 105 were shipped on the same day from GPO. Descriptive information on the volumes in question follows:

SuDocs Number: N 1.38/2:  
Title: Proceedings of the Ocean Drilling Program,  
          Part A  
Item Number: 0834-C-10  
Shipping List: 88-12-P  
Shipping list date: January 4, 1988

Please send the documents to the address specified in the letter:  
DO NOT send them to GPO!

15 June 1988

Dear Colleague:

As you are probably aware, the covers of Initial Reports Vols. 101/102, 103, and 105 of the Proceedings of the Ocean Drilling Program have faded to a grayish-green tint, either in part or in whole. As the publisher of these books, we regret this development just as much as you, the recipient, must. As a consequence, our printer has agreed to recall these books and to bind them with new covers printed with colorfast inks. The procedure is described as follows.

You may return any or all of these volumes to ODP headquarters, using our old mailing boxes, if you like. We will then mail a replacement book or books back to you free of charge.

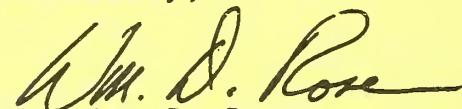

In order to concentrate the recall process within a manageable time frame, we need to receive your volume or volumes no later than 31 August of this year.

Please send your books to:

Ocean Drilling Program  
1000 Discovery Drive  
College Station, TX 77840  
Attn: Fabiola Byrne

Should you have any questions about this procedure, please let us know.

Sincerely,

  
William D. Rose  
Supervisor of Publications
